

POW Watershed Association (POWWA) Report, June 2017

Greetings!

### **Luck Watershed Restoration Field Visit and Discussion, Tuesday, June 13**

KK Prussian, hydrologist, for the USFS, would like to take interested folks and other stakeholders out to some of the restoration work done in the Luck watershed. The intent is to tour some of this work and to hear from local people about this and other proposed work in the watershed. Meet at City Hall at 2:30 to car pool out to Luck restoration sites, and then back to City Hall for the discussion. Jean has a flyer with a bit more information.

### **Kids Fishing Day, Saturday, June 17 from 9-2 at Gravelly Creek Picnic Area**

Lots of outdoor and fishing related activities, demonstrations, and booths. Free BBQ at noon! Lots of fun for kids-and adults!

### **POW LAT (Prince of Wales Landscape Assessment Team)**

The purpose of POW LAT is for POW stakeholders to assist the USFS in the development of a landscape level assessment for the island over the next 10-15 years. The team will provide recommendations related to timber, recreation, fish/wildlife habitat, and watershed restoration.

POWLAT had its last meeting May 18 and May 19. The final draft of proposed projects will be reviewed, finalized, and sent to the FS. I am including the URL for the POWLAT website which uses the POWCAC website to distribute information:  
<https://www.powcac.org/other-projects/>

Please contact me if you have any questions or concerns regarding local watersheds.
