

NEFA Report 08 2017

Steve Beilgard

the nefa van was sold by the ketchikan dealer, and went to wrangell schools. i learned this a month after the fact. it was sold on a pre-existing contract and the ford dealer had the signed title. i do have a check for \$13,500. for the city. we would like to address the monies owed by nefa to the city. to date, i've not seen anything of how much was owed or for what. also, it appears from the nefa charter that nefa owns the dock. we need to discuss this. we have daves welding in wrangell making a proposal to repair the ferry, and get coast guard approval. we have also listed the current ferry for sale, through a broker. any funds can first be used to pay existing claims against nefa, and then looking into the purchase of a new, or used, fast ferry such as is used by breakaway adventures in wrangle.

while not yet composed, i'll hopefully have a small packet of information for the mayor/ city council. 5 minutes should be adequate for me. thanks
