

## Water Report

April 2017

Greetings from the water world. Water usage has been minimal this past month. There were a couple leaks located during the previous cold spell, which had been causing a small rise in water demand. The leaks have been addressed and water usage is back to normal.

We recently ordered and received more barrels of chemical for the water plant. The new order will last well into the summer season.

The water has been turned on to the boat harbor and restroom near the city boat launch.

Now that spring has arrived and the roads are clear of ice and snow, I will be scheduling Tyler Rental to pump septic tanks as needed.

Ron and I will be planning on flushing water lines/hydrants in the near future as part of the annual maintenance to the water distribution system.

Any questions, give us a call.
